

A note from your HOA Board and Specialty Management 7/1/20

High Water Bills?! Please pay attention!

Hello Rock Springs Ridge Homeowners

A new Water Consumption Portal for our great City of Apopka is available for you to sign up. This Portal will alert you via text or email as to both potable water and reuse (irrigation/reclaimed) water consumption. So, if you happened to receive a \$300 reclaimed water bill as one of our Board members did due to an undiscovered irrigation leak, this will mitigate the potential damage.

You can set monthly, weekly, daily, and even vacation consumption alerts. The system is still new so when I contacted the City it is too early for them to give educated parameter guidance. I am not computer literate and it took me less than 5 minutes to complete!

Simply go onto the City of Apopka web site www.apopka.net and enter "water consumption" in the question queue. This will allow you to open the Water Consumption Portal and simply follow the directions.

The Portal shows your average consumptions so you can calculate and set your own notifications. All you need is your account number and PIN which is on the top of your water bill. The first meter number (the lower consumption) is for your potable water meter and the 2nd meter number (the higher consumption) is for your reuse/reclaimed/irrigation.

Thank you for the honor to serve,

Rod Olsen
