

# EAST PARK NEIGHBORHOOD 5 HOMEOWNERS ASSOCIATION

## PRESSURE WASHING NOTICE

To all members,

AQUABLAST will be starting our annual pressure washing of all sidewalks, curbs, and driveway aprons. These areas will be pressure washed and chemically cleaned to remove ground in dirt and mildew. The process will employ 100% tanked water, rinsed, and then sprayed with an algaecide solution. The reason these chemicals are used after pressure washing is to avoid any potential burning of grass from the chemicals during the pressure washing process.

Please be reminded that all owners are responsible for pressure washing your driveways, walkways, entry to keep them free of dirt, mildew, and stains.

Best Regards,  
J.R. Krisanda, LCAM
