

# Roof Cleaning Notice

**The ROOFS of all the condo units in FEATHER EDGE 2**  
are being cleaned beginning  
**Wednesday, April 13th.**

The project will take up to 3 days to complete, weather permitting.

**Please remove any items from the yard, front porch  
and back porch that cannot get wet!**

A chemical rinse will be used with low water pressure  
to clean the mildew stain.

Mid State Pro Maintenance is completing this project  
and **will be using condo unit water.** This is to prevent lawn and  
irrigation damage to common areas,  
which would be caused by a water truck.

Because of the low pressure, **very little water is used.**

If you have concerns about this, please present three consecutive water bills to  
Specialty Management to show any increase, and the association will evaluate  
possible reimbursement.
